PROJECT NO.	DATE SUBMITTED
000001-01	08/25/2023

PROJECT OBJECTIVES
Describe the high-level goals of the project and how they relate to overall business objectives. Include measurable success criteria. Cost, scheduling, and quality targets should list an absolute or relative value. Create a minimal viable product for a site that may be used for dating/match-making/friendship building purposes. You may only use the site if you are a member of the Toronto Metropolitan University community.

Project Deliverables

DELIVERABLE NO.	DESCRIPTION
1	Software Scope
2	Code
3	2 minute presentation of the creation

Out of Scope

Wishlist

This project **will NOT accomplish or include** the following:	List deliverables or tasks that you will not complete or provide as outputs of this project. Will not be a fully functioning site. Only accessible locally.

If there is time, this project **will accomplish or include** the following:	List deliverables or tasks that you will complete or provide as outputs of this project, **only if you have the time.**

Project Constraints

PROJECT START DATE	08/25/2023
LAUNCH / GO-LIVE DATE	08/27/2023
PROJECT END DATE	08/27/2023
LIST ANY HARD DEADLINE(S)	Competition submission date: Sunday, August 27, 2023

LIST OTHER DATES / DESCRIPTIONS OF KEY MILESTONES	
BUDGET CONSTRAINTS	Enter information about project budget limitations (total project budget, maximum budget for key project deliverables). The total budget is $0. Time constraint of 36 hours.
QUALITY OR PERFORMANCE CONSTRAINTS	Enter any other requirements for the functionality, performance, or quality of the project. Coding knowledge. We are all doing web development for the first time. This may lead to poorly designed site.

REGULATORY CONSTRAINTS	Enter any legal, policy, or other regulatory constraints. No **Plagiarization.** No **credit theft**.

Inspiration

As the anticipation of orientation season looms, we find ourselves reflecting on the intricate tapestry of our university days, particularly the art of forging lasting friendships. These recollections have led us to recognize a poignant need – the potential for a more streamlined and accessible approach to connecting with kindred spirits. Thus, the concept of a centralized network, designed to unite like-minded individuals, began to take shape in our minds.

What it does

Imagine a platform that simplifies the process of expanding your social circle. Through a straightforward sign-up procedure, you're invited to embark on a journey where friendships flourish organically, while you sit back and watch connections unfurl with ease.

How we built it

Our expedition was fueled by a blend of sheer determination and collaborative zeal. In our pursuit of mastery over front-end languages, we embraced the companionship of countless video calls. Together, we delved into the intricacies of coding and design, uniting our energies to bring our vision to life.

Challenges we ran into

The mastery of front-end development emerged as an exhilarating yet formidable challenge. This learning curve tested our adaptability and problem-solving skills, igniting a sense of accomplishment as we surmounted each obstacle.

Accomplishments that we're proud of

Our proudest moment arrives in the form of a fully functional minimum viable product. This achievement validates our dedication and underscores our belief in the potential of our endeavor.

What we learned

The journey has bestowed upon us invaluable skills. The intricacies of JavaScript, HTML, and CSS have become our companions, while the nuances of Git have sharpened our collaborative prowess.

What's next for METmate

Our aspirations reach further horizons. We envision METmate not merely as a platform but as a pivotal institution within the university's ecosystem. Our ambition is to secure funding, partnering with the institution to establish METmate as the official networking cornerstone, fostering connections that enrich the entire university experience.
